### **DETAILED ACTION**

### Information Disclosure Statement

1. The IDS filed 3/05/2002 has been considered and recorded in the file.

## Claim Objections

2. Claims 6 and 9 are objected to because of the following informalities: the limitation "either powered and activated" has to be changed as "either powered or activated". Appropriate correction is required.

## Specification

3. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

### Priority

4. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Art Unit: 2682

### Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35
U.S.C. 102 that form the basis for the rejections under this section made in this
Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Chua et al (6,690,956).

Regarding to claim 1, see Fig. 1, 2, Chua et al disclose a hand-free radiotelephone apparatus (110, , 100, 120) enabling hands-free use but preventing hand-held use of a radiotelephone (110) when a vehicle (120) or human-operated equipment is active or in motion, wherein the apparatus provides a link and connection between a mating unit (119) of the hand-free

Page 4

radiotelephone (110)(see Fig. 1) and a mating unit (129) of a radiotelephone-base of vehicle located inside the vehicle (120) or human-operated equipment, the filter being activated when the vehicle or human-operated equipment is started (see col. 5, line 66 to col. 7, line 25).

Regarding to claim 3, Chua et al disclose that the apparatus uses a base (129, 120) receiving a support for the radiotelephone (110), the support being a replaceable part of the radiotelephone (see Fig. 1, col. 3, line 28 to col. 4, line 12).

Regarding to claim 5, Chua et al disclose that the apparatus wherein the insertion of the radiotelephone of a driver of the vehicle or human-operated equipment into a base of the apparatus cuts off transmission (step 222) (Fig. 2) from the scrambler filter (see Fig. 2, col. 7, lines 4-8).

Regarding to claim 6, Chua et al disclose that the apparatus includes an electrical link between an electrical contact of the vehicle and the scrambler filter, the scrambler filter being either powered or activated by electrical link (121), or controlled by a voltage at the electrical link (121, ignition system) (see Fig. 1).

Art Unit: 2682

Regarding to claim 7, Chua et al disclose that the apparatus further comprises a base receiving a support for the radiotelephone, the support being a replaceable part of the radiotelephone (see Fig. 1, col. 3, line 29 to col. 5, line 65).

Regarding to claim 9, Chua et al disclose that the apparatus includes an electrical link between an electrical contact of the vehicle and the scrambler filter, the scrambler filter being either powered or activated by the electrical link (121), or controlled by a voltage at the electrical link (121, ignition system) (see Fig. 1, col. 3, line 29 to col. 5, line 65).

# Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 5

Art Unit: 2682

Page 6

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chua et al (6,690,956) in view of Takagi (5,749,057).

Regarding to claim 2, Chua et al does not disclose that the apparatus connects an outside antenna to the hands-free radiotelephone and to the scrambler filter simultaneously.

However, Takagi disclose that the apparatus connects an external antenna (205) which is mounted above the trunk of vehicle (see col. 3, lines 8-11).

At the time of the invention was made, it would have been obvious for one skilled in the art to implement Chua et al' antenna, as taught by Takagi in order to be able to mount above the trunk so that the apparatus is able to pick up better signals.

Regarding to claims 4 and 8, Chua et al does not disclose that the apparatus provides the connection to the hands-free radiotelephone for other passengers in the vehicle or human-operated equipment.

Art Unit: 2682

However, Takagi disclose that the apparatus provides the connection to the hands-free radiotelephone for other passengers in the vehicle or human-operated equipment (see col. 3, lines 4-7).

At the time of the invention was made, it would have been obvious for one skilled in the art to implement Chua et al' microphone, as taught by Takagi in order to be able to mount anywhere in the vehicle for the user so that the passengers can be able to use the apparatus.

### Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sanh D Phu whose telephone number is (703) 305–8635. The examiner can normally be reached on 8:00–16:30.

The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-8635.
